RE: Stream Channel Alteration No. 95-18-01SA
Miller Creek
Marion K. Nielson

Attached is a copy of Application to Alter a Natural Stream No. 95-18-01SA. Your comments are requested so we can evaluate any impacts caused by the project.

We are requesting that all comments be returned to me at our office prior to June 14, 1995. If we do not receive comments by that date, we will assume you have no input on the proposal outlined in the application.

If you have any questions or comments, feel free to contact Jim Wells at 538-7374.

Sincerely,

Shauna Howe

Project location or address:
At the head of Millers Canyon on 2 of the New Klondike Mining claims.
One of which is patented.

Brief description of project:
Reservoiring the annual spring and fall water flows to provide water for a small trommel, sluice operation. The water flow will not be diverted and will continue to flow in the existing channel. The water amounts vary during the spring and late fall months. The channel is normally dry during mid summer.

Purpose (justification) of project:
Placer gold recovery.

Is this a single and complete project or is it part of a larger project, continuing project, or other related activities? If so, please describe the large project or other related activities

This is a continuing project depending on the New Klondike Mining Co. considerations. We also have a continuing prospect using dry wash equipment in the Northwest quarter section. An application for this project was submitted Oct 1994.

If project includes the discharge of dredged or fill material:

Cubic yards of material: Less than 2,000 cubic yards annually.

Acreage or square footage of waters of the United States, including wetlands, affected by the project:
Unknown; flow varies from year to year and month to month depending on annual snow fall.
Source and type of fill material: Processed materials

Channel Alteration

Alternatives (other ways to accomplish the project purpose):

None.
